

News Release

Intellisense Systems achieves CMMI® Maturity Level 3 for Development

December 17, 2019 – Torrance, CA – Intellisense Systems, Inc., a leading provider of advanced sensing and display solutions, has obtained the CMMI® Maturity Level 3 (ML3) benchmark for development from the CMMI® Institute. This certification reflects a commitment to quality, continuous improvement, and dedication to customers. CMMI (Capability Maturity Model Integration) is a proven approach to performance management with decades of successful results, and obtaining CMMI ML3 demonstrates that Intellisense's performance and execution of projects, tasks, and operations are based on standards, procedures, and methods that are well defined and understood.

"Our accomplishment in achieving CMMI ML3 highlights the continued growth of Intellisense in the changing tech world," said Frank T. Willis, president and CEO of Intellisense. "Coupled with our ISO:AS9100 and ISO:AS9110 certifications, Intellisense continues to emphasize quality and provide excellence in solutions delivered to our clients."

Achieving CMMI ML3 highlights Intellisense Systems's proactive approach to project and process management techniques that help customers meet the ever-evolving market demands. This benchmark further emphasizes a dedication to delivering world-class engineering and products. This achievement also helps to define Intellisense's value of maturing the capabilities of our employees and teams.

As our teams decrease defects, cost, time, and risks, we simultaneously increase quality, performance and overall customer satisfaction. Our employees benefit from these maturing capabilities through our well-defined processes that reduce chances for error. These processes evolve into the best practices we adopt throughout Intellisense to improve employee performance and increase service quality. Further, our strategic improvements in employee management empower our teams to develop skills that in turn help our organization continue to succeed.

About IntelliSense Systems, Inc.

Intellisense Systems, Inc. is a leading provider of advanced sensing and display solutions supporting a data continuum from acquisition to visualization. We enhance our hardware with software that adds intelligence to our systems and can turn raw data into useful information for improved decision making and process automation. Intellisense Systems offers both off-the-shelf products and custom development services. These services include research and development, requirements analysis, design, systems integration, prototyping, production, testing, field support, and training. Headquartered in the South Bay area of Los Angeles, we occupy over 100,000-square feet across two facilities. Our manufacturing capabilities include electronics fabrication, unit qualification testing, systems integration, and volume production with full quality assurance.
