

## News Release

### **Intellisense Systems Moves into New Headquarters, Giving the Company Space to Continue on its Trajectory of Technology and Product Growth**

**The new facility nearly doubles the office and engineering space and puts most departments under one roof, improving collaboration and boosting productivity.**

**June 30, 2020 – Torrance, CA** – Intellisense Systems, Inc., a leading provider of contract research services, avionics displays, and environmental sensing solutions, has completed their relocation to a new headquarters building located at 21041 S. Western Avenue in Torrance, California. The company is the sole occupant of the completely remodeled office building.

“Only two years since we were established, Intellisense has doubled both our revenue and employees,” said Frank Willis, President and CEO at Intellisense Systems. “This consolidation has given us the opportunity to organize interacting departments together for improved collaboration. We also took this opportunity to update our labs and engineering spaces to improve development productivity. Although the building is larger than our previous facilities, the openness of the spaces has a unifying feel.”

The new location is a three-story building on the northwest corner of Torrance Blvd. and Western Ave. near Old Town Torrance. There are continuous windows for natural light on every floor, and each level also has its own lunchroom with several breakout and conference rooms. Visitor parking is available in front of the main entrance on the south side of the building. Intellisense will continue to manufacture their products in their nearby facilities at 20600 Gramercy Place for the foreseeable future.

#### **About Intellisense Systems, Inc.**

[Intellisense Systems](http://www.intellisenseinc.com), Inc. is a leading provider of advanced sensing and display solutions supporting a data continuum from acquisition to visualization. We enhance our hardware with software that adds intelligence to our systems and can turn raw data into useful information for improved decision making and process automation. Intellisense Systems offers both off-the-shelf products and custom development services. These services include research and development, requirements analysis, design, systems integration, prototyping, production, testing, field support, and training. Headquartered in the South Bay area of Los Angeles, the company occupies over 100,000 square feet across multiple facilities. Our manufacturing capabilities include electronics fabrication, unit qualification testing, systems integration, and volume production with full quality assurance. Intellisense Systems is qualified across engineering, accounting, and manufacturing to serve both government and commercial customers.
